Profile

Innovative Frontend Developer & Creative Designer

Driven by a passion for clean design and seamless user experiences, I specialize in building responsive, user-focused web applications that are both visually compelling and technically sound. With a strong command of modern frontend frameworks and UI/UX best practices, I craft pixel-perfect interfaces that align with brand identity and exceed user expectations. My unique background in architectural visualization enriches my design approach with spatial awareness and aesthetic precision. Additionally, my skills in dynamic video production allow me to deliver polished, multimedia-rich digital experiences. A collaborative team player, I excel at translating visual concepts into flawless, functional code across multidisciplinary teams.

Skills

Frontend Development

HTML, CSS, JavaScript, TypeScript, React.js, Next.js, Tailwind CSS, Material UI (MUI), ShadCN, Redux, Context API, i18next, next-intl, Responsive Email Templates, Git, GitHub

Backend Development
